NIRMAL SOLANKI

WEB DEVELOPER · FRONTEND & FULL-STACK

Engineering high-performance, responsive web applications with clean, scalable code.

PROFESSIONAL SUMMARY

Performance-driven Web Developer with strong proficiency in JavaScript, React.js, Node.js, Express, and MongoDB. Demonstrated track record of developing fully responsive, component-driven web applications, integrating real-time RESTful APIs, and crafting intuitive user interfaces. Committed to writing clean, maintainable code, solving complex front-to-back engineering challenges, and shipping high-value digital experiences with modern web standards.

FEATURED ENGINEERING PROJECTS

CHRONICLE – Real-Time News & Editorial Platform

Live Demo ↗ · Code ↗

React 19 · Vite · REST APIs · Axios · LocalStorage · CSS3

- Architected an editorial news and blogging web app delivering real-time worldwide headlines via multi-category REST API feeds.
- Integrated interactive weather forecasting, custom productivity calendar widget, and client-side bookmark persistence.
- Engineered a fully fluid, mobile-first responsive layout with custom search and lightning-fast load times.

Fashion E-Commerce Storefront

Live Demo ↗ · Code ↗

React.js · Modular CSS · State Management · Responsive Design

- Developed a modern e-commerce storefront with intuitive product catalog navigation, banner showcases, and category filters.
- Implemented client-side search, product grid cards, interactive cart state, and smooth micro-animations.
- Ensured 100% responsiveness across mobile, tablet, and high-resolution desktop viewports.

Worklix Job Portal Platform

Live Demo ↗ · Code ↗

Node.js · Express.js · MongoDB · EJS · REST Architecture

- Engineered a backend-driven job discovery and recruitment platform with structured routing and database schemas.
- Built candidate job browsing, application submission workflows, and robust server-side controllers.
- Designed modular MVC architecture prepared for production deployment and secure data operations.

Kaira Web Application

Live Demo ↗ · Code ↗

React.js · CSS3 · UI/UX Design · Component Lifecycle

- Designed an elegant brand showcase web application with reusable component structure and visual rhythm.
- Implemented mobile drawer navigation, accessible interactions, and responsive typography.

ENGINEERING PRINCIPLES

01 Architecture
Deconstruct requirements, establish modular components, and maintain predictable state.

02 Clean Code
Adhere to semantic HTML, modern ES6+ standards, and maintainable project structure.

03 Performance
Optimize responsive layouts, eliminate layout shifts, and ensure cross-browser stability.
